

BOMImed Inc. – Manufacturing Engineer/Technologist

BOMImed is looking for a Manufacturing Engineer/Technologist that will work in the Operations department with daily manufacturing involvement, to gather analyze data, make recommendations, act as a liaison between Engineering and Manufacturing, and implement solutions to improve capacity, quality and efficiency, while reducing cost and lead times.

Duties and Responsibilities

- Write documents such as equipment operation, quality inspection, and maintenance procedures
- Provide training to Machine Operators and Assembly personnel while ensuring compliance with regulatory and quality requirements
- Provide technical support to the Production team to ensure work orders are successfully completed on time, including troubleshooting and fixing manufacturing equipment
- Analyze and optimize manufacturing processes for efficiency, quality, output, and safety
- Generate reports on key metrics such as throughput and waste, including analysis, root causes, and proposed solutions
- Specify and maintain calibrated tools, including reviewing approving data
- Participate in continual improvement projects and process improvements related to plastics manufacturing, assembly, and kitting
- Review and update shop floor plans, analyze workflow and material flow, and make recommendations for improved efficiency
- Determine suitable manufacturing methods and equipment for new products

Skills and Experience

- Excellent communication skills, including proficiency in both written and spoken English
- Demonstrates initiative and ability to work both independently and with teams
- Strong interpersonal, analytical, problem solving, and organizational skills
- Computer proficiency with MS Office (Word, Excel, PowerPoint and Outlook)
- Experience with or knowledge of plastics manufacturing and automated equipment is required
- Experience in automation is required
- Technical experience on pneumatic, electrical and mechanical manufacturing equipment is required
- 3 years' experience with SolidWorks modeling CAD software is an important asset

Education

- Bachelor's degree or College diploma in Mechanical or Manufacturing
- Registration with Engineers Geoscientists Manitoba or Certified Technicians & Technologists Association or eligibility for registration is required
