ft3 is growing and we are currently searching for a Intermediate or Senior Architectural Technologist

Description

ft3 has an immediate need for an Intermediate OR Senior Architectural Technologist. Reporting to the Project Architect and Partner-in-Charge, the Technologist will be responsible for Contract Document and BIM model management simultaneously on several projects consisting of the following key duties:

Main Responsibilities and Duties

- Setup, coordination and supervision of the BIM model;
- Coordinate model/drawings (internal) between Architecture, Landscape and Interior Design;
- Coordinate model/drawings with external consultants;
- Participate in shop drawing reviews;
- Participate in reviewing Construction Documents prior to Tender (including Peer reviews);
- (Occasional) site reviews together with the Contract Admin team.

Qualifications

- The successful candidate will have the following qualifications:
- Five (Intermediate) to ten (Senior) years of related work experience;
- A degree, diploma or certificate in construction or design related field;
- Extensive practical and working knowledge of construction practices and regulations;
- Extensive practical and working knowledge of Construction detailing;
- Experience in coordinating and managing BIM models (Revit);
- Thorough understanding of Revit and AutoCAD;
- Strong coordination and organization skills;
- High attention to detail and accuracy;
- Determination to set and manage priorities to meet all deadlines;
- Outstanding written and verbal communication skills;
- ABTAM or CTTAM Certification is preferred.
