

# Instrumentation Technician

Manitoba

The Instrumentation Technician ensures the efficient operation of all process control instrumentation in the plant. The Instrumentation Technician will be required to fully understand the purpose and operation of the equipment throughout the plant and be able to make decisions based on sound judgment when a situation dictates.

## Key Responsibilities:

- Documenting, monitoring, maintaining and assisting with reporting of shift events, logging Predictive Maintenance data, and assisting with work planning utilizing information systems and productivity software.
- Identifying and performing preventative/predictive maintenance on equipment throughout the facility.
- Maintaining Company standards for quality, food safety, sanitation, and GMPs.
- Maintaining the necessary level of communication with team members and other support groups.
- Assisting with the design and layout of automation systems.
- Assisting with training other plant personnel.
- Troubleshooting and making minor and major repairs of equipment, including automation systems.
- Ensures that all work-related activities within the facility are accomplished through methods that promote safety to employees and which minimize potential impact to the community and environment in which we live.

## You and Your Experience:

- Industrial Instrumentation/automation experience and certification as a Red Seal Journeyman Instrumentation Mechanic or Instrumentation Technologist / Technician.
- A thorough knowledge of Programmable Logic Controllers and Control Systems. Preference to the knowledge of DeltaV, Foundation Field Bus, ASi Bus, DeviceNet, and Rockwell Automation products.
- To possess well-developed computer skills.
- To be able to read and understand P&IDs, PFDs, schematics, and technical manuals.
- Strong aptitude for safe work practices.
- Excellent interpersonal and communication skills.
- An outstanding ability to work successfully as a part of a multi-disciplined team.

## How to Apply:

Please apply online at [www.peoplefirsthr.com/jobs/](http://www.peoplefirsthr.com/jobs/) or by emailing your resume (in MS WORD format) in confidence to Brittney Frias at [bfrias@peoplefirsthr.com](mailto:bfrias@peoplefirsthr.com)

*We thank all applicants for their interest; however, only those selected will be contacted for an interview.*
