Has a solid technical background. Can interpret drawings and customer specifications. Knowledgeable in inspection techniques and manufacturing processes. Good understanding of Quality Management System.

Attainment of Project Management, NPI/PPAP experience, internal audit certification or AS/ISO lead auditor certification is considered an asset .

About Us

Magellan Aerospace is a global, integrated aerospace company that provides complex assemblies and systems solutions to aircraft and engine manufacturers, and defence and space agencies worldwide. The organization officially adopted the name “Magellan Aerospace Corporation” in 1996; deriving it from the intrepid explorer Ferdinand Magellan. His global exploits at the turn of the 15th century established a number of firsts, so the company’s vision has been to carry this same legacy into the future of the aerospace industry.

At Magellan we have over 80 years of collective knowledge and experience in the aerospace industry, and believe one truth: People create value. Employees are our greatest resource in working towards a successful future, and together we build professional relationships that thrive. We know that personal development is fundamental to the success of every individual, and every individual is fundamental to the success of our business, so we invest in our employees and provide excellent career progression opportunities. When you are part of Magellan, you are part of the team!

Confidentiality

Magellan Aerospace respects the privacy and confidentiality of personal information provided by candidates and shall not disclose to any external parties unless legislated.
