

SLR Consulting – Junior Environmental Scientist, Engineer or Technologist

We are SLR Consulting (Canada), a 400+ team of environmental/regulatory professionals across the country. We are a leading consulting firm delivering over 30 technical disciplines helping our clients reach their environmental and sustainability goals. With over 25 years of experience, we are a recognized leader in environmental and advisory solutions.

As our new Environmental Scientist / Engineer / Technologist, you will play an important role on a team whose work is essential to achieving this goal.

Job Description

Role

As a member of our Land and Water team in Winnipeg, you'll enjoy a flexible and dynamic work environment, where your personal success will depend on your collaborative working style, your client-centric mindset, and your superb technical skills. In this position, you'll work primarily in the field collecting and interpreting environmental data and also work closely with your team to deliver high-quality work to our clients.

Key Responsibilities

Responsibilities:

- Participate in all facets of contaminated site projects including Phase I and II Environmental Site Assessments (ESA) and remediation projects, field sampling, and reporting.
- Conduct field (data-collection) programs involving sampling and monitoring of soil, groundwater, surface water, vapour, and remediation system operation and maintenance.
- Conduct independent analyses, interpretations, and conclusions.
- Prepare a variety of environmental reports

Working @ SLR

With us, there is no doubt you'll grow your subject-matter expertise and industry knowledge. We care about investing in our employees for the long-run, and if you ask our team, they'll tell you that's just one of the many benefits of working here. We want to be a place where you can experience career growth and satisfaction for many years.

Here's what else you'll enjoy as part of our team:

- Competitive total compensation package commensurate with experience
- Comprehensive benefit plan and a suite of wellness initiatives
- Full-time, permanent role with flexible scheduling available

- Opportunities for professional growth and advancement

Qualifications/Education/Memberships:

- Ideally 1- 3 years of experience in contaminated site assessment and remediation or other environmental consulting services
- Knowledge and practical application of health & safety requirements unique to subsurface investigations and contaminated sites
- Able to work in remote locations and adapt to conditions/resources
- Bachelor's degree or technical diploma in engineering, geological science, or environmental science
- Professional status or eligibility for professional status with a professional organization (P.Eng., P.Geo., P.Ag., E.I.T., G.I.T., C.E.T., A.Sc.T. preferred)
- Valid driver's license for travel to job sites/clients

SLR strives to build diverse teams that reflect the communities we work in, and encourages applications from traditionally underrepresented groups including women, visible minorities, Indigenous peoples, people identifying as LGBTQ+, veterans, and people with disabilities.

If we can make the recruitment process easier through accommodation, please contact a member of the People team at canadacareers@slrconsulting.com.
