Full Job Description

Are you a motivated and entrepreneurial individual who wants to be more just another employee in the corporate chain? TREK focuses on mentoring individuals and providing the necessary tools and environment for employees to grow in a manner suited to the individual. TREK is looking for a full-time technologist to provide field support to our geotechnical team in our Winnipeg office.

The successful candidate will complete site investigations and exploration programs for new projects, provide construction support services and may provide support to our material testing services group from time to time. Individuals who are enthusiastic about taking more control of their careers will be well suited to meet the expectations of this position.

TREK Geotechnical Inc. is a Manitoba owned and operated engineering consulting firm providing geotechnical, environmental and hydrotechnical engineering services in Manitoba, Saskatchewan, Ontario, Nunavut, Yukon and Alberta. Headquartered in Winnipeg, Manitoba with over thirty full-time staff, TREK provides geotechnical services through its respected engineering and materials testing departments. TREK provides in-house laboratory testing services and construction management capabilities with surveying and on-site quality control testing services. TREK has provided design and construction services to both public and private sector clients on numerous projects including riverbank stabilization, bridge and culvert design, detailed river hydraulic modeling, municipal drainage, flood mapping and design of flood protection infrastructure. Further information about our projects and clients are available on our website at www.trekgeotechnical.ca.

Qualifications:

- Diploma from a Civil Engineering Technology Program is required.
- At least five years of relatable experience.
- Currently registered as a C.Tech or C.E.T in Manitoba or eligible for registration
- Strong communication skills

- Willingness to work overtime and outside the City of Winnipeg on a regular basis
- Comfortable on construction sites
- Geotechnical experience will be considered an asset
- Moderate computer skills and AutoCad / Geostudio skills will be considered an asset
- AutoCad (Civil 3D) skills will be considered an asset
- Surveying skills will be considered an asset
- Valid drivers' license required

Job Responsibilities:

- Complete sub-surface investigations
- Observation of pile installation
- Undertake resident contract administration of construction projects
- Perform geotechnical instrumentation monitoring
- Conduct materials testing and quality control inspections
- Assist senior staff in geotechnical analysis, design and contract administration
- Other engineering related responsibilities
